The following information is given in good faith and for guidance only. The user shall be responsible for determining that the performance of the product is sufficient for their application. The quoted values are based on averages and should not be taken as maximum or minimum values for specific purposes.

SELF ADHESIVE SCREW COVERS

Self Adhesive Screw Covers are designed specifically to hide the screw covers on the interior of the caravan. Most modern decorative panels are produced laminating a cover material onto plywood, mdf or composite laminate. These cover materials can be either paper backed vinyls, paper foils, pvc's or acrylics. We stock and convert a huge range of these cover materials, in a variety of modern and contemporary designs into self-adhesive screw covers to be used as an alternative to traditional push on plastic caps.

Product Features

No glue needed, self-adhesive for easy application.

Takes away the risk of a choking hazard – traditional push on caps can be removed young children

Produced using actual cover materials and not digital reproductions ensuring exact matches to the cover material for a seamless appearance.

Strong and robust.

Available in multi sizes and multi colours.

Technical Data

Construction - Wood grain cellulose, vinyl or paper backed vinyl surface with modified solvent acrylic adhesive system

Adhesive performance - Peel adhesion on V2A steel after 20 min at 300 mm/min. and 23°C > 20N/25mm

Shear adhesion - 25 mm² on V2A steel, 1 kg weight at 23° and 50 % rel. atmospheric humidity – > 5hours

Temperature range – – 10°C – + 60°C

WALLBOARD TAPE

Caravan interiors are constructed using either composite panels or decorative wallboards. When two of these boards or panels, butt up to each other, a joint is created that then needs to be hidden, using either a decorative moulding or a wallboard jointing tape. Whilst decorative mouldings are an effective solution, the advantage of a wallboard tape is cost and weight savings, both critical in touring manufacturing but also of benefit in static manufacturing as the cost savings can be up to 50% when compared to D Mould.

We have been producing self-adhesive wallboard tapes from our inception in 2002. Our finished products are moisture stable, plasticizer resistant and will adhere to both embossed and debossed surfaces. Our specialist acrylic adhesive systems have been carefully designed and modified, ensuring that the adhesives will perform on a whole range of surfaces including paper-backed vinyl, in either solid or multiprint lacquered designs, and cellulose papers, including the current Superflex varieties. Many of the current wallpapers have up to two or three colour prints, comprising PVC/PVA based inks. After printing, some papers are impregnated and coated with different proportions of resins, stabilisers and acrylate dispersions, depending on desired hardness or flexibility, together with acid-hardening lacquer's both catalytic and thermal. It is imperative, therefore, that our adhesive is permanent and is not affected any of these variants. We also include in our range a scrim reinforced, ultra-high coat weight adhesive, specifically for challenging wallboards with low surface energy.

Our Jagenberg laminator is capable of handling wallpaper log widths of up to 1.35m and reel diameter of up to 600mm, enabling us to process jumbo logs direct from the manufacturer. Our fully trained operators have worked on base papers from 70 grams per square metre to 200 grams per square metre and our CNC controlled Cevenini ED400 fully automatic lathe slitter is acknowledged as being one of the most accurate in the industry with a slitting tolerance of +/- 0.05mm to ensure our finished rolls are of the highest quality. Whilst our standard wallboard tapes are produced in a variety of widths at 50m roll lengths, we also supply the aftermarket with 5M & 10m length rolls and due to our longevity within the industry, still hold wallpaper designs in stock from our inception.

EAZI-STOPSTM BUMPER FEET

Our range of Eazi-Stops™ bumper feet are manufactured to exacting tolerances and are of the highest quality. We hold large finished stocks and have the flexibility to turn around bespoke orders in fast lead times. Our standard colours are clear and black, but other colours are available with minimum order quantities.

Uses and Properties

- Used as feet, stops, spacers, protectors,
- Noise and vibration resistant
- Non-slip
- Excellent adhesive properties,
- Excellent heat dissipation qualities
- Excellent sound-damping qualities,
- Abrasion resistant
- UV resistant
- Guaranteed not to leave any marks on surfaces
- Transparent appearance, Guaranteed not to yellow
- Simple to apply, discreet and extremely hard wearing
- Produced from polyurethane (highly durable)

[Eazi-Stops™](#) is a branded division of Hillcroft North West Ltd.

MIRROR MOUNTING

VELCRO® Brand Heavy Duty

VELCRO® Brand Heavy Duty is perfect for mounting mirrors and other requirements within the caravan.

VELCRO® Brand Heavy Duty is just that bit tougher than our everyday VELCRO Brand® Stick On. These coins, strips and tapes have 50% more holding power thanks to the moulded plastic hook feature and boast a seriously strong, water-resistant adhesive.

This means that even whilst the caravan is moving, VELCRO® Brand Heavy Duty will keep mirrors and other wall features perfectly secure.

BUNDLING AND STRUCTURED CABLING

VELCRO® Brand One-Wrap

One-Wrap® is the ultimate, reusable, back to back self-gripping tape. It has a low profile loop on one side and plastic hooks on the other. The strap can be cut to any length and will never peel. One-Wrap® straps are perfect for creating permanent and reusable ties for cables within caravans. It is strong enough to hold but will not damage any wires. They are strong, reusable, adjustable and gently protect fragile wires in the safest way.

ONE-WRAP® tape and straps are the safe, reusable, adjustable alternative to plastic cable ties making it a more sustainable product for the environment.

Potential Uses
Charging Cables
Kitchen Utensils Cables
TV/Computer Cables
Unused Cables for storage

Currently available in Black.
Other colours available, subject to minimum order quantity.

CARPET ATTACHMENT

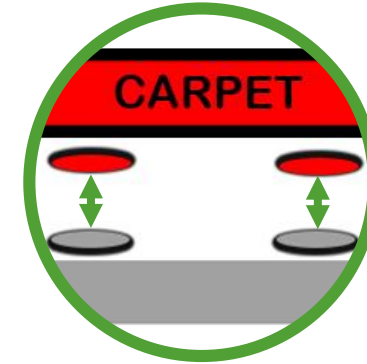

NON SLIP MESH OR VELCRO

NON SLIP MESH

Traditionally, Caravan Manufacturers use press studs to attach carpets to the caravan floor. However, using these can cause alignment difficulties during fitting.

An Alternative to this is non slip mesh. Applying this between the carpet and the flooring reduces movement and provides a secure base for the carpet.

VELCRO® BRAND FASTENER

Another attachment method as an alternative to press studs is VELCRO® Brand Fasteners.

Using VELCRO® Brand Fasteners allows the carpet to be placed down securely and with ease. VELCRO® Brand Fasteners are also undetectable as they are easily colour matched to the carpet, making them unnoticeable whilst still holding the carpet firmly in place.

VELCRO BRAND ALFALOK

EXTERNAL PANNELLING

VELCRO® Brand ALFA-LOK™ fastener is a strong, self-engaging tape and is easy to use, it is an excellent solution to holding external panelling onto the caravan.

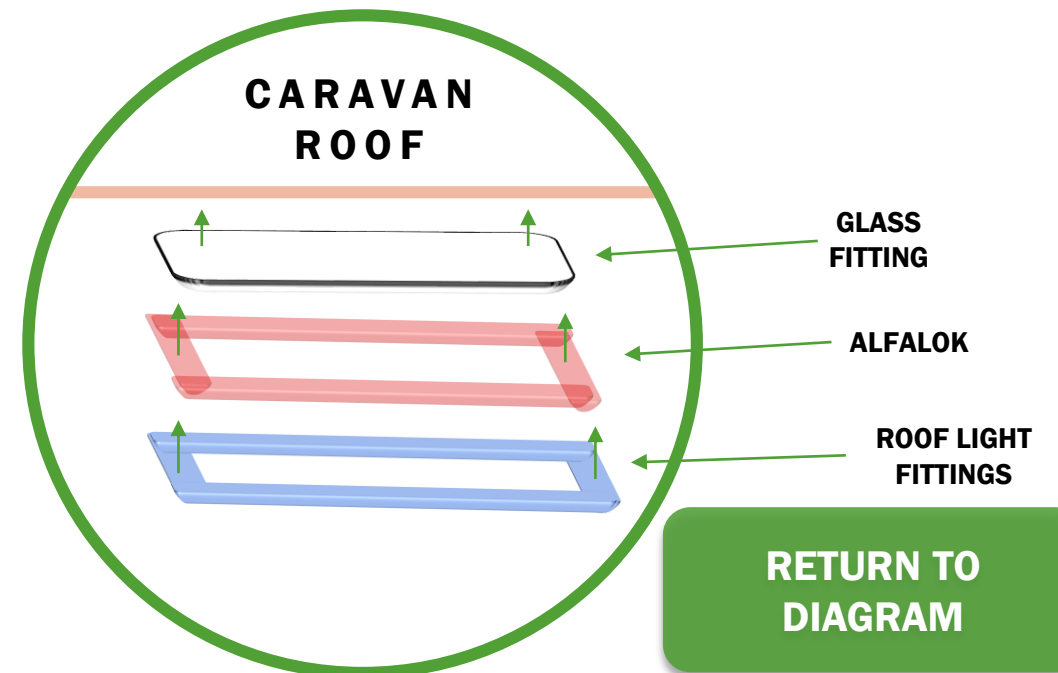

VELCRO® Brand ALFA-LOK™ is a more desirable fastener than gun grade sealant as the sealant carries inherent weight. Whilst gun grade adhesives are an effective fixing solution, the advantage of using ALFA-LOK™ is cost and weight savings, both critical in touring manufacturing but also of benefit in static manufacturing as the cost savings can be significant when compared to gun grade sealants.

ROOF LIGHT SURROUND

VELCRO® Brand ALFA-LOK™ fastener is perfect for holding roof light surrounds in place. The quadrilobed mushroom shape of the tape ensures a firm and reliable connection.

Using ALFA-LOK™ allows the surround trim to be removed and/or replaced.

VELCRO BRAND PRODUCTS

VELCRO® Brand Fastener – PS14 Self Adhesive

PS14 Self adhesive VELCRO® Brand is one of the most popular fasteners in the range, available on 25 metre rolls the tape has a rubber adhesive backing that allows you to stick on to almost any surface with the exception of plastics or anything containing plasticizers. VELCRO® Brand rolls are ideal for those who use the fastener in large volumes and offer a cost-effective solution to many fastening requirements.
